**AUTOMATIC TRANSMISSION FLUID RECOMMENDATION GUIDE**

## 2022 ATF RECOMMENDATION GUIDE

The following pages list the vehicles for which our transmission fluids may or may not be used.

### VERSATRANS® ATF

Kendall® VersaTrans ATF is recommended for older (mostly pre-2006) vehicles designed for a higher-viscosity fluid. It is a premium quality, part-synthetic transmission fluid, and has been extensively field tested for use in most North American vehicles and in a wide variety of European and Japanese vehicles. It is OEM-approved for service fill in the following applications:

- FORD MERCON® V (LICENSE NOS. M5091007, M5091008, M5091009)
- VOITH DIWA TRANSMISSIONS

### VERSATRANS LV ATF

Kendall VersaTrans LV ATF is recommended for most 2006 and newer vehicles that require a low-viscosity fluid, as well as many older vehicles. It is approved for use in passenger car and light truck automatic transmissions that require a Ford MERCON LV or GM DEXRON®-VI fluid. It also is recommended for use in Toyota vehicles where a Type WS fluid is specified, and in many newer import vehicles. It is OEM-approved for service fill in the following applications:

- FORD MERCON LV (LICENSE NOS. MLV140201, MLV140202, MLV140203)
- GM DEXRON-VI (LICENSE NO. J-60175)

### VERSATRANS ULV ATF

Kendall VersaTrans ULV ATF is recommended for use in newer Ford and GM vehicles with 9 and 10 speed transmissions where the manufacturer recommends MERCON ULV, DEXRON ULV, or equivalent fluids. It is not recommended for use in dual clutch transmissions (DCTs), belt or chain driven continuously variable transmissions (CVTs), or older transmissions that require a higher-viscosity fluid. Please refer to the owner's manual for correct fluid recommendation.

- FORD MERCON ULV (LICENSE NO. MULV220502)

### VERSATRANS CVT PLUS FLUID

This premium quality, full-synthetic transmission fluid is specifically designed for use in passenger cars and trucks with belt- and chain-driven continuously variable transmissions, as well as step-type automatic transmissions. It is meant for use in a wide range of out-of-warranty vehicles that require either a step ATF or CVT fluid, which helps shops reduce inventory and minimize the risk of misapplication. With more than 1 million miles of on-road testing, it has proven to deliver performance and protection to all three types of transmissions.

OEM fluids and part numbers can be found in the Chek-Chart Lubrication Guides published by MOTOR Information Systems. Multiple listings are specific to certain models, and model years and are NOT interchangeable. Please consult the owner's guide to verify the proper fluid recommendation for the vehicle.
