

# Sunoco 260 GT Plus™

Sunoco 260 GT Plus is a high octane, highly oxygenated unleaded race fuel. If you're looking for a high octane unleaded fuel with more oxygen than pump gas, 260 GT Plus is your fuel.

Because it contains more oxygen than is allowed in pump gas, 260 GT Plus is for off-road and racing use only. However, it will not harm oxygen sensors. Due to its higher oxygen content, a corresponding increase in fuel flow is required to utilize the full potential of this fuel compared to conventional non-oxygenated fuels.

Sunoco 260 GT Plus contains additives to enhance shelf life and promote engine cleanliness. As with any gasoline, it should be stored in opaque, tightly sealed containers and kept where temperatures are stable. Properly stored, the shelf life of 260 GT Plus is in excess of 1 year.

**Note: sun light (ultraviolet light) can degrade the octane of this fuel and must be avoided.**

TYPICAL PROPERTIES	
COLOR .....	<b>LIGHT BLUE</b>
OCTANE NUMBER (R+M)/2.....	<b>104</b>
RESEARCH OCTANE NUMBER (RON) .....	<b>110</b>
MOTOR OCTANE NUMBER (MON) .....	<b>98</b>
SPECIFIC GRAVITY .....	<b>0.761</b>
DENSITY (POUNDS/GALLON) .....	<b>6.3</b>
REID VAPOR PRESSURE (PSI) .....	<b>6.1</b>
DISTILLATION (DEGREES F)	
10% EVAPORATED .....	<b>148</b>
50% EVAPORATED .....	<b>212</b>
90% EVAPORATED .....	<b>233</b>
STOICHIOMETRIC AIR/FUEL RATIO .....	<b>13.7</b>
OXYGEN (WEIGHT %) .....	<b>4.7</b>
ETHANOL (VOLUME %) .....	<b>13</b>
H/C RATIO.....	<b>1.87</b>
O/C RATIO.....	<b>0.043</b>
LOWER HEATING VALUE (BTU/LB) .....	<b>17,400</b>
LOWER HEATING VALUE (BTU/GAL) .....	<b>110,300</b>
LEADED.....	<b>NO</b>

For off-road and racing applications only. Legal in California only for racing vehicles in sanctioned racing events.
