

CONSISTENCY YOU CAN COUNT ON

- Double distilled for consistency every time you fill up
- Our highest-octane unleaded fuel with no ethanol
- Safe for all fuel systems
- Long shelf life without losing octane or performance
- Off-road use only

Optimal engine performance depends on high-quality fuel. Whether you're a professional racer or simply want the best for your engine, Sunoco can deliver what you need from a fuel.

260 GTX is a cut above other brands of fuel because Sunoco uses a unique double distillation process to increase octane and remove variations from our Race Fuels. This extra step not only improves the purity and cleanliness of the fuel but ensures you get the same exact fuel every time you fill up with Sunoco Race Fuels.

260 GTX is our highest-octane unleaded fuel with no ethanol. These qualities make it perfect for boats, exotic vehicles, collector cars and race series that need a robust fuel that can excel in a wide variety of applications without having concern of water intrusion into the fuel. 260 GTX is safe for all fuel systems and has an extremely long shelf life without losing octane or performance.

Questions? Call our helpline for expert advice. Drive with Sunoco Race Fuels and experience the high-performance difference.
