| Chemical Name | CAS # | % |
|---|--------------|----------|
| Hydrotreated light distillate (Petroleum) | 64742-47-8 | 50 -70 |

Note: Specific chemical identities and/or exact percentages have been withheld as a trade secret.

SECTION 4 First aid measures

| | |
|-----------------------|---|
| Inhalation | If symptoms are experienced remove source of contamination or move victim to fresh air and obtain medical advice. |
| Eyes | Flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention. |
| Skin Contact | Wash with soap and water. Get medical attention if irritation develops or persists. |
| Ingestion | Do not induce vomiting and seek medical attention immediately. Provide medical care provider with this SDS. If vomiting occurs, lean victim forward to reduce risk of aspiration into lungs. |
| Note to Doctor | Treat symptomatically. |

SECTION 5 Firefighting measures

| | |
|---|--|
| Extinguishing media | Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid. |
| Fire and/or Explosion Hazards | Vapors may be ignited by sparks, flames or other sources of ignition if material is above the flash point giving rise to a fire (Class B). Vapors are heavier than air and may travel to a source of ignition and flash back. Empty containers that retain product residue (liquid, solid/sludge, or vapor) can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose container to heat, flame, sparks, static electricity, or other sources of ignition. Any of these actions can potentially cause an explosion that may lead to injury or death. |
| Fire Fighting Methods and Protection | Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Use appropriate methods for the surrounding fire. |
| Hazardous Combustion Products | Oxides of carbon, Smoke, Hydrocarbons, Sulfur compounds |

SECTION 6 Accidental release measures

| | |
|--|--|
| Personal precautions, protective equipment and emergency procedures | Exposure to the spilled material may be irritating or harmful. Follow personal protective equipment recommendations found in Section VIII of this SDS. Additional precautions may be necessary based on special circumstances created by the spill including; the material spilled, the quantity of the spill, the area in which the spill occurred. Also consider the expertise of employees in the area responding to the spill. Evaporation of volatile substances can lead to the displacement of air creating an environment that can cause asphyxiation. |
| Methods and materials for containment and cleaning up | Absorb or cover with dry earth, sand or other non-combustible material and transfer to appropriate waste containers. Use clean, non-sparking tools to collect absorbed material. Collect and discard in accordance with local, state and national regulations. |

SECTION 7 Handling and storage

| | |
|---|--|
| Precautions for safe handling | Avoid contacting and avoid breathing the material. Use only in a well ventilated area. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Wash thoroughly after handling. Do not get in eyes, on skin and clothing. Ground and bond containers when transferring material. "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. |
| Conditions for safe storage, including any incompatibilities | Store in a cool dry ventilated location. Isolate from incompatible materials and conditions. Keep container(s) closed. Keep container closed when not in use. Keep away from heat, sparks, and flame. |
| Incompatible materials | Strong oxidizing agents, Strong acids, Strong alkalis |

| Engineering Measures | Local exhaust ventilation or other engineering controls are normally required when handling or using this product to avoid overexposure. Engineering controls must be designed to meet the OSHA chemical specific standard in 29 CFR 1910. Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits |
| Respiratory Protection | Proper ventilation (at a minimum) will be required when handling this product. Use respirators (NIOSH approved) only if ventilation cannot be used to eliminate symptoms or reduce the exposure to below acceptable levels. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator. |
| Eye Protection | Wear chemically resistant safety glasses with side shields when handling this product. Do not wear contact lenses. |
| Skin Protection | Not normally considered a skin hazard. Where use of product can result in skin contact, practice good personal hygiene and wear a barrier cream and/or impervious surgical style gloves. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. |
| Gloves | Chemically resistant gloves |
